

Managed Endpoint Security

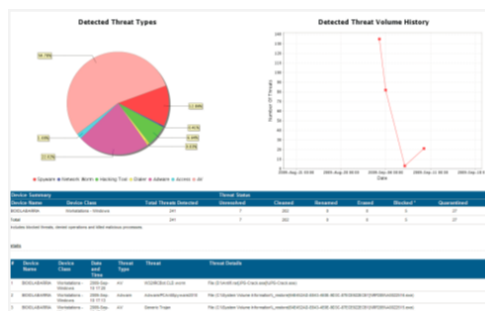

Protect your network from virus attacks

Clarotech's **Managed Anti-Virus Service** provides skilled IT resources, domain expertise, centralized monitoring/management facilities and a proactive approach to ensure the protection of your servers, desktops and laptops against the ever present threat of viruses and malware attacks.

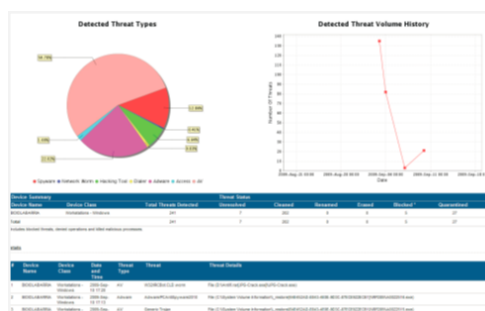

Benefits of a Managed Anti-Virus Service

- **Fully managed solution for the same price as anti-virus software!**
The enterprise-class endpoint software is monitored 24/7 and managed by a team of technical experts that can detect virus outbreaks and unprotected devices.
- **Remote maintenance**
All devices from desktops to network equipment are maintained remotely by a team of experts.
- **Comprehensive reporting**
Monthly reports are provided that show endpoint security threats and remedial action.
- **Protect critical assets and information**
Proactive technologies ensure an additional protection layer against all types of unknown malware and spyware.
- **A flexible security solution**
Advanced security features offer the appropriate security for any size of company and network.

Get all inclusive protection against viruses and malware, and only pay for the licenses used on a month-to-month basis!
