

Managed Services

Keep your focus on your business

Clarotech's **Managed IT Service** is perfect for companies who want to focus on their business without the distraction of managing and maintaining their IT infrastructure.

With this service, all day-to-day IT-related responsibility is transferred to Clarotech. Working together with its clients, Clarotech will implement state-of-the-art monitoring, management and support operations that will lead to longer IT equipment lifecycles, better business continuity and effective use of available IT technologies.

To ensure maximum benefit for our client, Clarotech follows a strict feasibility study before any implementations occur.

The feasibility study includes an infrastructure site audit and network assessment. Clarotech's solutions team will make any necessary recommendations to ensure that the network is suitable for management.

Clarotech will manage and maintain your IT infrastructure
