

Proactive Infrastructure Maintenance

Monitoring packages to suit your needs

At Clarotech we understand that IT is critical to a company's daily business operations. That's why we align our IT support services with real-world business requirements by offering flexible device and application monitoring packages.

Features

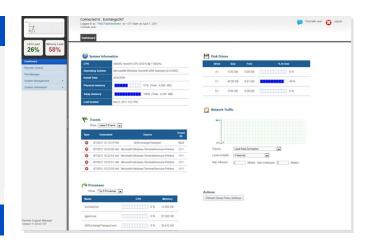

- SMS Alerts report on critical infrastructure events
- Active monitoring during business hours ensures servers, PCs and other network devices function optimally, with improved reliability and better security.
- 24x7 performance monitoring ensures critical servers and network devices are functioning normally at all times.
- Customisable monitoring allows you to select which monitoring package best suits your business and add advanced services to optimise your investment.

Customise a monitoring package to suite you needs!
